

## THESE DOCTORS COME MOM-APPROVED

**W**hen your child is sick, nothing is more important to you than finding the best doctor and the best care. How to do it? Probably you'll turn to a circle of friends, family, other moms you know. You want to know both that the doctor has the skills your child needs and a way about them that will put your sick kid at ease.

Chicago Parent has a circle of readers who have been in those tough moments. Over the past months, we've been asking our readers to nominate doctors they believe in, doctors they trust and respect. And we've received hundreds of nominations. Pediatricians, dentists, specialists of every stripe. We've gathered those nominations in this special section, Chicago's Favorite Kids Docs.

On the pages that follow, you'll find a ready list of doctors who have been highly recommended by Chicago moms and dads from their first-hand experience. Many of the nominations also have reader comments at [ChicagoParent.com/kidsdocs](http://ChicagoParent.com/kidsdocs). Our staff has also vetted each nomination to check on qualifications, specialties and contact information. We hope you'll look at this list of health care professionals as a great resource to start your search for the doctor your child needs.
